THIS DOCUMENT CONTAINS REFORMATION AFFECTING THE MATIONAL DEFAURD OF THE GINTLE STATES WITHIN THE LEARNING OF THE ESPONANT ACT TO 9, 9, C., 2, 14 AD 93, 45 ALEGRADE, ITS THANBASISTICS OF THE CHILATION OF THE CH

THIS, IS UNEVALUATED INFORMATION

- 25X1 Under provisions of the Czechoslovak Five Year Plan, the airfield at Tri Duby (Q49/C 74) (see attachments A and B) is to be expanded into one of the largest and most modern airfields in CSB. Hangars, are being constructed, and the landing runways are being enlarged. During the war this field was used by military aircraft, but now it is used by the Czechoslovak airlines. Atmospheric conditions in this area are exceptionally good for flying because in winter there is little snow, extremes in weather are unusual, and good landing conditions prevail even in rain. According to source the Russian Air Force is interested in this field because of its strategic position in the center of Slovakia.
 - The airfield at Mokrad (Q50/X 91) near Liptavsky Hradek is to be greatly improved. This field was built by the German Air Force and the majority of the buildings were destroyed upon their withdrawal. These buildings are all teing repaired by the Czechoslovak Air Force using unreliable and anti-communistic soldiers as a source of cheap labor. All of the runways are in excellent condition and any plane in the Czech Air Force is able to land, even the heaviest transports. At the village of Petr, about 2 kilometers from the airfield, a housing project is under construction to accommodate the expected influx of airforce personnel. A school for NCO's is presently in operation at the field. The school is emphasizing a special course on German planes in the Czech Air Force (Messerschmitts, Focke-Wolfs). Reportedly, the Russiaus have shown interest in this field because of its location in Slovakia.
- 3. The MRAZ aircraft factory located at Cocen nad Orlici (Chotzen 051/N 09) (see attachment C and D) builds Sokol sport planes, 3-passenger Bonzo and 4-passenger Skaut planes. The factory also repairs police and civilian air club planes and can change to military aircraft production on short notice. It employs about 500 men and has modern equipment and machinery. The
